Experience

Cognizant Technology Solutions — Hyderabad, India
Web Development Intern — *Feb 2022 - Jun 2022*

- Completed **400-hour** intensive **front-end web development** training through Cognizant early engagement program, gaining expertise in **MERN** stack (MongoDB, Express, React, and Node.js).
- Developed and maintained front-end components for multiple web applications using React.js, ensuring responsiveness and optimizing performance.
- Collaborated with cross-functional teams to identify and resolve software defects by employing debugging techniques and writing unit tests, resulting in a 15% reduction in overall bug count and enhanced application stability.

Alltronics Technologies Pvt. Ltd — Hyderabad, India
Front end developer — *Apr 2021 - Dec 2021*

- Developed and customized **WordPress** websites by creating custom themes and modifying existing ones to improve responsiveness, user experience, and site performance.
- Collaborated with clients to gather requirements and provide technical consultation, translating business needs into functional website features and UI/UX elements
- Identified and resolved WordPress site issues, including plugin conflicts, broken links, and CSS/JavaScript errors, to maintain high performance and minimal downtime through consistent maintenance, updates, and code optimization.

Projects

GroupSync Chat: Event-Driven Messaging with Polls and Reminders: *Project link*
- Implemented a real-time group chat application using **React.js**, centered around event-driven chat rooms with advanced collaboration tools such as **polls**, **reminders**, and pinned messages to enhance group engagement and decision making.
- Utilized **react-router-dom** library for smooth navigation, React **Context API** for efficient state management, and **WebSocket** for real-time message updates.

Re-imagine UNCC: Interactive Image Colorization Web Application for UNC Charlotte: *Project link*
- Designed a **responsive web application** that allows users to upload and perform real-time colorization of historical black-and-white images of the UNC Charlotte campus.
- Fine-tuned a **Stable Diffusion** model on a curated dataset of historical and contemporary images (from the 1960s to the present), resulting in a 12% improvement in FID score over existing solutions. The model accurately restored the campus's vibrant hues and iconic clay theme, enhancing visual fidelity.

Certifications

- The Complete Web Development Bootcamp from Udemy.
- WordPress : The Complete WordPress Website Course from Udemy.
- Complete Python Bootcamp From Zero to Hero in Python from Udemy
- Ultimate AWS Certified Solutions Architect Associate SAA-C03.
